

GE Oil & Gas Digital

Digital Transformation Journey

The Next Productivity Conundrum

Unleashing 3-5% Productivity Gains

- Cloud based Technology Stack
- Agile Mindset
- Data Analytics & Machine learning
- New and broad way of engaging with customers, employees & ecosystem
- Entirely new way of doing business

The promise of Digital Industrial Transformation

GE's Predix

PURPOSE-BUILT FOR THE INDUSTRIAL INTERNET OF THINGS

Industrial-grade technology

Optimized for asset data models and operational workflows

Designed for Industrial Big Data and Analytics

Modern Development tools for faster Innovation

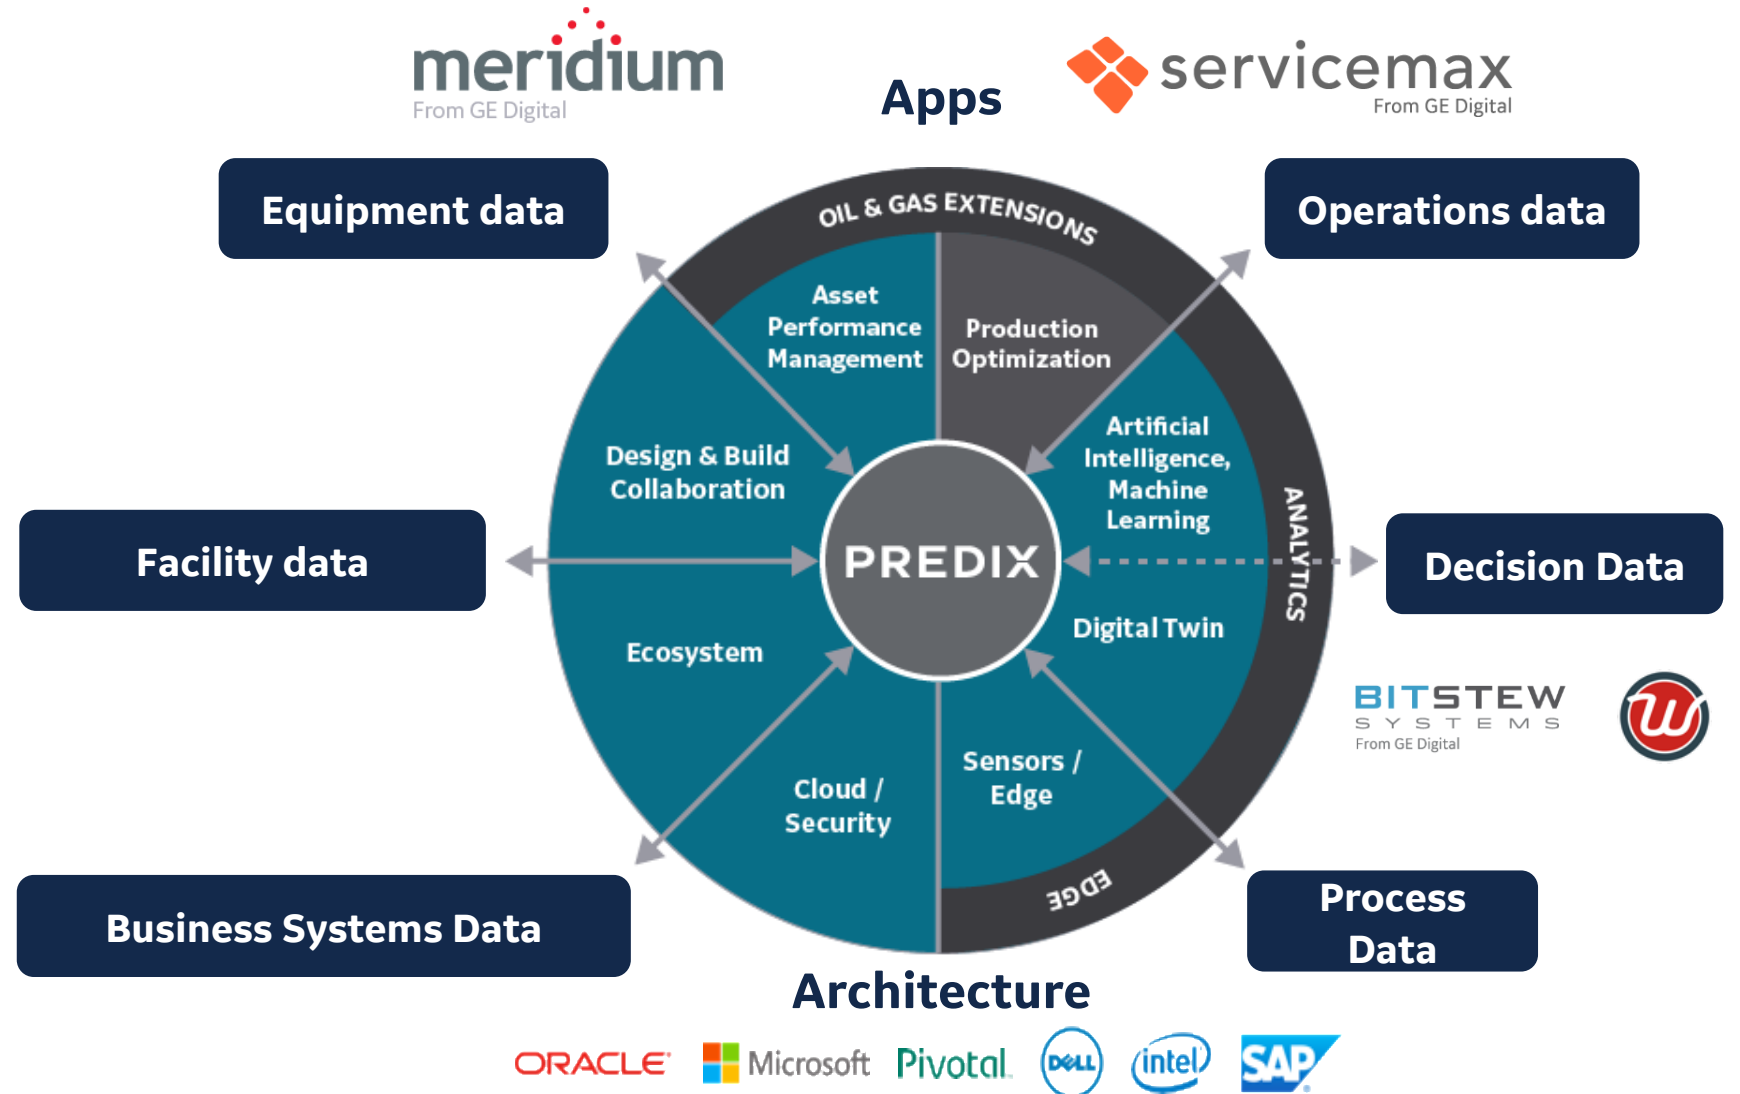

Predix-Powered Oil & Gas world

Software and analytics

Change
management

- Continuous learning
- Think, see & act like top talent
- Drive proactive business operations
- Eliminates manual, ad-hoc decision making
- Increase productivity
- Improve speed, and efficiency

Asset Performance Management for Offshore

Largest Predix APM deployment at scale covering systems + platforms

Machine learning + digital twin analytics

Events, alerts, workflows

Full deployment ... cover 400-600 assets and asset classes, deployed 20MM+ tags

Next steps:
Expansion into reliability management + inspection

\$100MM+
Bottom line impact per 1% efficiency improvement

Customer challenge

- Siloed business operations
- Safety concerns
- Reactive to process upsets

Solution

Predix APM + O&G extensions providing fleet-wide insights for real-time visibility of global plant operations

- 1) Excursion and anomaly management
- 2) Equipment monitoring and analysis
- 3) Process Surveillance
- 4) Knowledge repository ... best practice sharing

Outcomes and value

Connected | Insights | Optimized

Improved safety, engineering productivity, data visibility and efficient decision making

Reduced production deferrals

Contributing to 2-4% higher global operations efficiency

Asset Performance Management for LNG

Solution overview

- APM ... Cloud deployed solution providing:
- Single unified Platform & User experience
 - Analytics & Reporting ... real time & mobile
 - Alarm & collaborative Alert Management
- Integration with RasGas IT infrastructure

Project highlights

- LNG operator
- Leveraging one GE Store
- Discovery, analysis, solution design in partnership with the customer

Scope

Train 5: Reliability

- Mixed gas & Propane refrigeration units
- Dehydration unit

Train 6+7: Optimize

- Mixed gas & Propane Refrigeration units
- Nitrogen rejection unit
- NGL extraction

Capabilities

- Increase reliability through "google-like" predictive analytics
- Optimize by comparing trains & analyzing process leakages

Outcome

- Lower LNG Volumetric Downtime (VDT)
- Lower cost of maintenance
- Decrease flash gas (by 50%)
- Reduce excess chilling power

Customer Value

Driving productivity on non-GE equipment as well ...leading to full plant APM solutions

Leapfrog Digital Transformation ... GE's Learnings

Data Analytics

- First-of-its-kind layering of complex data sets
- Data compression, ingestion, shaping, abstraction remains a core challenge

Edge to Cloud Industrial Computing

- Computing power, security, architecture of large, distributed data sets
- Edge analytics
- Machine applications

Value is in Digital Twin – Physics + Analytics

- Every asset to operate like the most productive asset
- Create knowledge repository and continuously improve

Industrial-grade cloud OS Predix

- Micro-service architecture
- Best in class UX / Design
- Mobility
- Built for Industrial workloads

Power of Ecosystem

- Scale and Speed are key
- Moving from System of Record to System of Engagement

imagination at work
